

Simple explanation of what each HTML tag in the provided code does:

1. `<!DOCTYPE html>`: This tells the web browser that the document is an HTML5 document.
2. `<html lang="en">`: This tag indicates the beginning of the HTML document and specifies that the language of the content is English.
3. `<head>`: This section contains meta-information about the document, such as its title and links to stylesheets.
4. `<meta charset="UTF-8">`: This tag sets the character encoding for the document to UTF-8, which includes most characters from all languages.
5. `<meta name="viewport" content="width=device-width, initial-scale=1.0">`: This tag makes the webpage responsive, ensuring it displays well on different devices by setting the viewport width to the device's width.
6. `<title>OTIM ISAAC'S Biography</title>`: This sets the title of the webpage, which appears in the browser's title bar or tab.
7. `<link rel="icon" type="image/x-icon" href="groupzlogo.jpg">`: This tag links to an icon image that represents the website (favicon).
8. `<link rel="stylesheet" href="styles.css">`: This links to an external CSS file (styles.css) that contains styles for the webpage.
9. `<body>`: This tag contains all the content that will be displayed on the webpage.
10. `<header>`: This section typically contains introductory content or navigational links.
11. `<h1>`: This is a top-level heading, usually the main title of the page. Here, it displays the name "OTIM ISAAC" and a student ID.
12. `<nav>`: This section contains navigation links for the website.
13. `<ul>`: This creates an unordered list.
14. `<li>`: Each of these tags represents a list item within the unordered list. They contain links to different pages (Home, Participant 1, Participant 2, etc.).
15. `<main>`: This tag indicates the main content area of the webpage.
16. `<div class="profile">`: This creates a division (or section) for the profile content. The class attribute can be used for styling.
17. ``: This tag displays an image (profile picture) on the webpage. The alt attribute provides alternative text for the image.
18. `<h2>`: This is a second-level heading, used for subheadings within the content (Background, Professional Interests and Hobbies, Career Aspirations).
19. `<p>`: This tag is used for paragraphs of text.

20. <footer>: This section contains footer content, typically including copyright information or links.

21. <p>&copy; Group Z 2024 Biographies Website</p>: This is a paragraph in the footer that displays copyright information.

Each of these tags helps structure the webpage and define how the content is organized and displayed.
